Investment management style

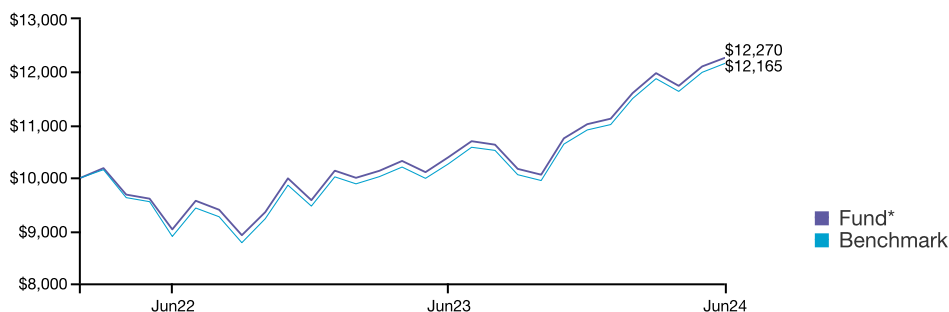

Each LifePath® strategy is a diversified portfolio, tailored to the investment time horizon of the investor. The name of each strategy represents the year when the investor will most likely begin to draw interest and/or principal out of their investment portfolio. The Fund employs an investment model that analyzes asset class data including risk, correlations and expected returns, and provides portfolio recommendations amongst broad asset classes. The allocations are constantly monitored and rebalanced quarterly in an effort to maximize expected return for a given level of risk.

Fund objective

To provide investors with a single fund that's broadly diversified among Canadian and global stocks, bonds and alternative investments. The Fund automatically evolves to a more conservative asset mix over time to match the investor's investment time horizon.
